

## Facts about stroke

- Stroke is the third leading cause of death in the United States and the leading cause of adult disability.
- A stroke occurs when something happens to interrupt the steady flow of blood to the brain, like a clot or a burst in a blood vessel. Brain cells quickly begin to die.

## You can beat a stroke

Disabilities can be prevented or limited, but the patient must go to the emergency room immediately.

### Tip: Go in an ambulance!

**Save time. Be seen faster.**

Produced by Heart Disease and Stroke Prevention and Control Program; Massachusetts Department of Public Health. Made possible with funding from the U.S. Centers for Disease Control and Prevention.

# Is it a stroke?

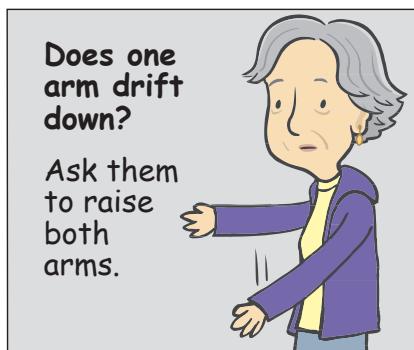

## Check these signs FAST!

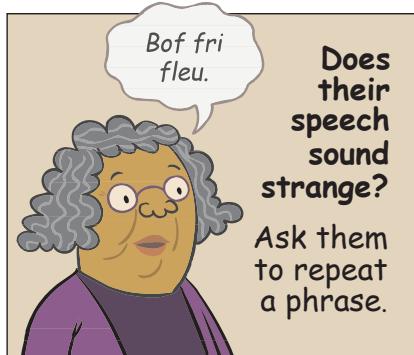

# Is it a stroke? Check these signs **FAST!**

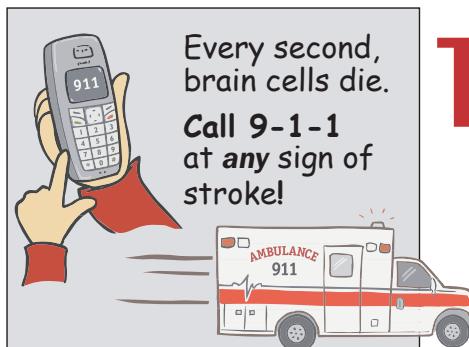

## Face

## Arm

## Speech

## Time

**Act FAST.**  
**Call 9-1-1 at any sign of stroke!**

## Risk factors for stroke

**Mini-strokes.** (transient ischemic attacks or TIAs) When stroke symptoms such as confusion, slurred speech or loss of balance appear and disappear, call 9-1-1. You may be able to prevent a major stroke.

**High blood pressure.** The #1 cause of stroke. Monitor blood pressure and always take prescribed medication.

**Diabetes.** Control the symptoms of diabetes with proper diet, exercise and medication.

**Obesity.** Being just 20 pounds overweight significantly increases your risk of stroke and heart disease.

**Smoking.** Smoking increases risk of stroke by two to three times.

## Another way to remember stroke symptoms

- Sudden weakness on one side of the body
- Sudden confusion, trouble speaking or understanding
- Sudden trouble seeing
- Sudden trouble walking or loss of balance
- Sudden severe headache with no known cause

**Call 9-1-1  
at any sign of stroke.**
